SOME RULES FOR SINGULAR NOUNS:

a or an is the indefinite article. It indicates something like "one"

For example: *I see a zebra and an elephant*.

I don't have a sister, but I have a brother.

When do we use <u>a</u> in front of a noun? When do we use <u>an</u>?

Nouns that begin in a vowel (A, E, I, O, U) will use an in front of them:

Examples: an umbrella an experience

an orchestra an island

an automobile an apartment

Nouns that begin in a consonant will use **a** in front of them:

a park a garden

a bicycle a computer

a street a library

How do we make a noun plural? We usually just add -s.

For example: an animal many animals

a telephone many telephones

Sometimes, we have to add -es.

For example: a bus many buses

a class many classes

a box many boxes

a church many churches

We will learn more about singular and plural nouns in class.
